## 1 Quality Attributes

### Identity

Knowing what specific ingredients are present in each product is key. Protein can come from a variety of sources; Verified Inside tests the protein identity in addition to Purity and Potency measures.

### Purity

Verification testing for chemical, microbiological, allergenic contaminants and known adulterants.

### Strength & Composition

Strength, or commonly used term potency refers to verification tests to confirm quantity of dietary ingredients, markers, nutritional declarations and to ensure the compositional integrity of the product.
